

Odessa- Route 131 Interchange Locations

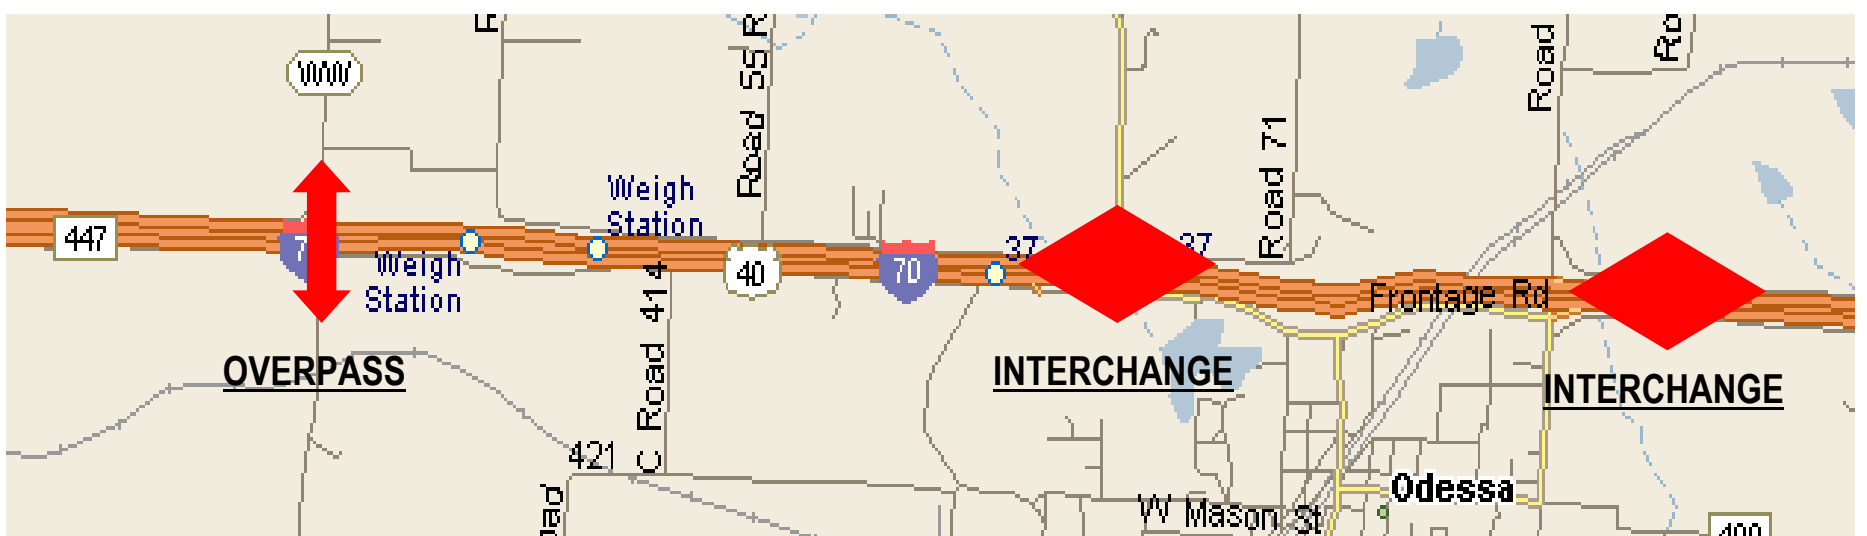

I-70 access in Odessa is a complex issue. MoDOT plans for Odessa to ultimately have two full interchanges rather than the current irregular configuration. We need your input on both interchange locations and interchange designs in Odessa. Under any scenario, a new Johnson Road interchange would be included.

Option A- New interchanges at WW and Johnson Road with an overpass at existing Route 131.

Option B- New interchanges at Barton Road or Hughes Road and Johnson Road with existing Route 131 access removed and an overpass at Route WW.

Option C- New interchanges at Route 131 and Johnson Road with an overpass at Route WW.
